Meet Reggie Reduce

Activity:

1. Can you name the materials he is made from?

2. His hair comes from a replaceable mop head. That means he doesn't need to buy a whole new mop when it runs out. Can you think of anything else you can buy with replacement parts?

E.g.

1. His arms and legs are made of pipe insulation.
2. Reuse material as insulation

Tip: Go to the new Suffolk Schools Recycling website where you can find the answers using the magnifiable images.
