## Meet Reggie Reduce Answer Sheet

## 1. Can you label the materials Reggie is made from that help him reduce his waste?

His body is made from a wormery so that he can make compost out of his fruit and veg. peelings

He uses reusable bags instead of single use carrier bags

His legs are made using plant pots which he uses to grow his own food reducing packaging and food miles

He has a watering can head so he can water his vegetable garden

Patchwork waistcoat made from old clothes instead of throwing them away

Tool belt so that he can fix things and not throw them away

His arms and legs are made from pipe insulation so he can save energy

2. Reggie's hair is made from a replaceable mop head. That means he doesn't need to buy a whole new mop when it runs out. Can you think of other things with replacement parts?

Possible answers: ink cartridges, refills, rechargeable batteries, light bulbs etc...
