

# Meet Reggie Reduce

## Activity:

1. Can you label the materials Reggie is made from that help him reduce his waste ?
2. Reggie's hair is made from a replaceable mop head. That means he doesn't need to buy a whole new mop when it runs out. Can you think of other things you can buy with replacement parts?

### E.g.

1. His arms and legs are made of pipe insulation so he saves energy

**Tip:** Go back to the 4Rs page to see the Answers sheet using the magnifiable images.
