

Meet Robin Recycle

Activity:

1. Robin is made from the materials you can recycle at home. Label as many of the materials you can see.
2. Use our website and the internet to explore what happens to these materials once they have been collected from your door. What sort of products do they eventually become?

E.g.

1. Plastic bottle
2. Bottles are taken to a sorting facility where they are cleaned and turned into small pellets before being melted and formed into new plastic products. They can be made into new bottles or other items such as garden furniture or toys

Tip : look at <https://www.suffolkrecycling.org.uk/my-bins/what-can-i-put-in-my-recycling-bin-at-home> for what goes in your recycling bin
